SP0000

SP0000 socket pin receptacles allow for solderless mounting of Sxnnn switches from [E³].

Installation of Sxnnn switches with or without socket pin receptacles will result in the same built-in height of the switches.

Switches are secured in the high precision sockets with spring tension. Additionally, the switches may be secured with the SL000 Socket Lock (available upon request).

Description

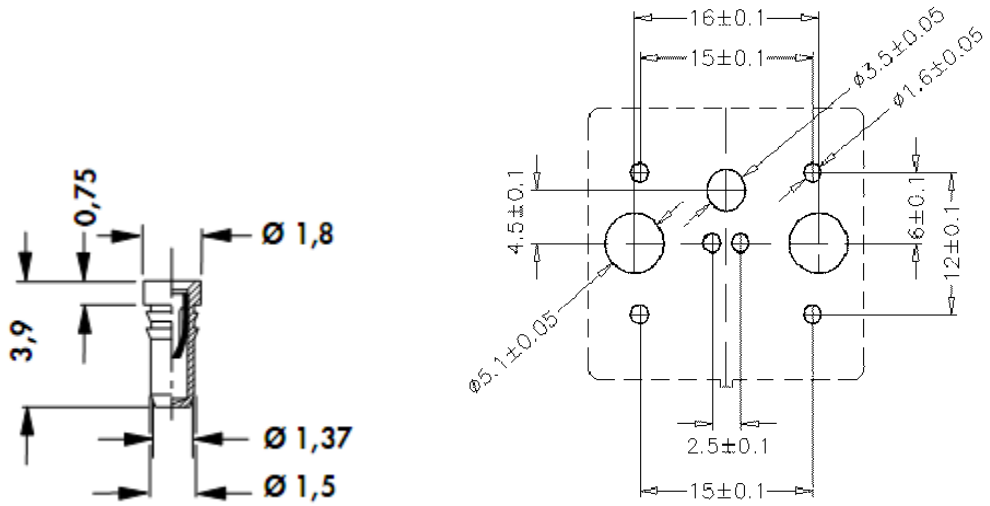

High-precision contacts are mounted into a temperature resistant carrier strip.

Available single strips: from 6 pins to endless.

Surface finish: gold

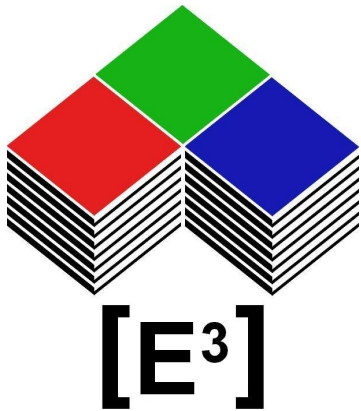

NOTE: SP0000 Socket Pins are sold in sets of six (6) matching the number of contacts per Sxnnn switch.
